## **Textbook Alignment to the Utah Core – 6<sup>th</sup> Grade Mathematics**

This alignment has been completed using an "In ( <u>www.schools.utah.gov/curr/imc/i</u>	dependent Alignment Vendor" from the USOE ndvendor.html.) Yes _	approved list	
Name of Company and Individual Conducting Alignment: <u>St</u>	andard Media Services, LLC: David A. Johns	<u>on</u>	
A "Credential Sheet" has been completed on the above company/	evaluator and is (Please check one of the following):		
☐ On record with the USOE.			
✓ The "Credential Sheet" is attached to this alignment.			
Instructional Materials Evaluation Criteria (name and grade of the	he core document used to align): Grade 6 Mat	hematics	
Title: Math Connects ©2009 Course 1	ISBN#: <u>978-0-07-</u>	-874042-8	
Publisher: Glencoe/McGraw-Hill			
Overall percentage of coverage in the Student Edition (SE) and Te  Overall percentage of coverage in ancillary materials of the Utah O	Core Curriculum:%	rriculum: <u>99</u>	%
STANDARD I: Students will expand number sense to include opera	Tuons with rational numbers.		
Percentage of coverage in the student and teacher edition for Standard I: 98 %	Percentage of coverage not in student or tea the <i>ancillary material</i> for Standard I:		vered in
Objectives & Indicators	Coverage in Student Edition(SE) and Teacher Edition (TE) (pg #'s, etc.)	Coverage in  Ancillary Material (titles, pg #'s, etc.)	Not covered in TE, SE or ancillaries ✓
Objective 1.1: Represent rational numbers in a variety of ways.			

a.	Recognize a rational number as a ratio of two integers, a to b, where b is not equal to zero.	SE/TE: LA2-LA6, 225-228, 229-232	
b.	Change whole numbers with exponents to standard form (e.g., $2^4 = 16$ ) and recognize that any non-zero whole number to the zero power equals 1 (e.g., $9^0 = 1$ ).	SE/TE: 32-36, 38-40, 41, 44-46, 64-67, 69, 70, 73, 74, 672, 679, 738-739	
c.	Write a whole number in expanded form using exponents (e.g., $876,539 = 8 \times 10^5 + 7 \times 10^4 + 6 \times 10^3 + 5 \times 10^2 + 3 \times 10^1 + 9 \times 10^0$ ).	SE/TE: 32-36, 38-40, 41, 69, 73, 74, 77, 195, 361, 672	
d.	Express numbers in scientific notation using positive powers of ten.	See related content— SE/TE: 164, 679	
	tive 1.2: Explain relationships and equivalencies among		
a.	Place rational numbers on the number line.	SE/TE: 141, 145, 219, 221, 232, 277-279, 290, 303, LA2-LA5, 750	
b.	Compare and order rational numbers, including positive and negative mixed fractions and decimals, using a variety of methods and symbols, including the number line and finding common denominators.	SE/TE: 141, 142-145, 146-149, 182, 209, 220-224, 229-232, 241, 243, 249-253, 404, 575, LA3-LA4, 683, 740	
c.	Find equivalent forms for common fractions, decimals, percents, and ratios, including repeating or terminating decimals.	SE/TE: 142-145, 202-203, 204-208, 220-222, 225-226, 232, 239, 241, 247, 253, 261-262, 263-268, 269, 270-274, 275, 287-290, 304, 313, 314-316, 322-327, 329-333, 334-339, 356, 357, 358, 363, 365-367, 370-371, 376, 377-380, 381-382, 395, 7401-404, 407, 408, 409, 683, 746, 749	
d.	Relate percents less than 1% or greater than 100% to equivalent fractions, decimals, whole numbers, and mixed numbers.	SE/TE: 365-369, 376, 377-380, 407, 408, 598, 746	

e.	Recognize that the sum of an integer and its additive inverse is zero.	SE/TE: 748; see also related content—576, 577-578, 584, 644-648, 649, 650, 651-654, 665	
	ctive 1.3: Use number theory concepts to find prime rizations, least common multiples, and greatest common rs.		
a.	Determine whether whole numbers to 100 are prime, composite, or neither.	SE/TE: 28-31, 32-36, 41, 69, 73, 195, 196, 198-201, 239, 672	
b.	Find the prime factorization of composite numbers to 100.	SE/TE: 28-31, 32-36, 41, 69, 73, 195, 198- 201, 204-208, 228, 239, 672	
c.	Find the greatest common factor and least common multiple for two numbers using a variety of methods (e.g., list of multiples, prime factorization).	SE/TE: 197-201, 204-208, 213, 216-219, 220- 221, 226, 239, 240, 243, 306, 314-315, 363, 365-366, 681, 682	
	ctive 1.4: Model and illustrate meanings of operations and ibe how they relate.		
a.	Relate fractions to multiplication and division and use this relationship to explain procedures for multiplying and dividing fractions.	SE/TE: 204-206, 209-210, 220-222, 225-226, 229-230, 263-265, 270-271, 282-283, 287-288, 291, 293-294, 298-299, 304, 305, 313, 314-316, 334-336, 363, 365-367, 746	
b.	Recognize that ratios derive from pairs of rows in the multiplication table and connect with equivalent fractions.	SE/TE: 322-327, 328, 329-333, 334-339, 341, 342, 343-348, 349-353, 356, 357, 358, 363, 689	
c.	Give mixed number and decimal solutions to division problems with whole numbers.	SE/TE: 77, 173-174, 179-180, 209-212, 213, 230, 239, 242, 744	
Objec	ctive 1.5: Solve problems involving multiple steps.		
a.	Select appropriate methods to solve a multi-step problem involving multiplication and division of fractions and decimals.	SE/TE: 6-7, 103, 105, 163-164, 198, 230, 263-264, 322-323, 401-402, 560, 661-662, 666, 705	
b.	Use estimation to determine whether results obtained using a calculator are reasonable.	SE/TE: 25-26, 162, 179, 532	

			T.	1
c.	Use estimation or calculation to compute results, depending on the context and numbers involved in the problem.	SE/TE: 24-27, 144, 153, 163-164, 173-174, 180, 184, 302, 401-404, 405, 422-423, 741-742		
d.	Solve problems involving ratios and proportions.	SE/TE: 314-319, 322-327, 328, 329-333, 324-339, 341, 343-348, 349-353, 356, 357, 358, 402, 407, 409, 688		
with 1	ctive 1.6: Demonstrate proficiency with the four operations, positive rational numbers, and with addition and action of integers.			
a.	Multiply and divide a multi-digit number by a two-digit number, including decimals.	SE/TE: 137, 163-166, 167-168, 169-172, 173-176, 177-178, 183, 189, 190, 191, 680		
b.	Add, subtract, multiply, and divide fractions and mixed numbers.	256-260, 261-262, 263-268, 269, 270-274, 275, 276-279, 280-281, 282-286, 287-290, 291-292, 293-297, 298-301, 303,304, 305, 306, 307, 682, 683, 685, 686, 687		
c.	Add and subtract integers.	SE/TE: 577-581, 582-586, 650, 651-654, 656, 700, 701		
relation Perce	DARD II: Students will use patterns, relations, and algebraic onships.  Intage of coverage in the student and teacher edition for lard II: 100 %	expressions to represent and analyze mathem  Percentage of coverage not in student or tead the ancillary material for Standard II:		
Овје	CTIVES & INDICATORS	Coverage in Student Edition(SE) and Teacher Edition (TE) (pg #'s, etc.)	Coverage in Ancillary Material (titles, pg #'s, etc.)	Not covered in TE, SE or ancillaries
Objective 2.1: Analyze algebraic expressions, tables, and graphs to determine patterns, relations, and rules.				
a.	Describe simple relationships by creating and analyzing tables, equations, and expressions.	SE/TE: 42-46, 47-48, 49-53, 55, 63-67, 70, 73, 80, 81-85, 86-87, 88-91, 92-95, 96-91-		

b.	Draw a graph and write an equation from a table of values.	100, 101, 158-160, 265-267, 281, 282-285, 288-289, 292, 296, 299-300, 343-347, 348, 358, 368, 379, 630-631, 642-643, 650, 730, 734-735  SE/TE: 83, 91, 235-236, 242, 354, 358, 684, 689, 732-733, 734, 735		
c.	Draw a graph and create a table of values from an equation.	SE/TE: 654, 684		
expre	ctive 2.2: Write, interpret, and use mathematical essions, equations, and formulas to represent and solve ems that correspond to given situations.			
a.	Solve single variable linear equations using a variety of strategies.	SE/TE: 47-48, 71, 91, 343-348, 349-353, 668, 689		
b.	Recognize that expressions in different forms can be equivalent and rewrite an expression to represent a quantity in a different way.	SE/TE: 636-641, 642-648, 649, 650, 651-654, 664		
c.	Evaluate and simplify expressions and formulas, substituting given values for the variables (e.g., $2x + 4$ ; $x = 2$ ; therefore, $2(2) + 4 = 8$ ).	SE/TE: 42-46, 49-53, 57-60, 63-67, 70, 72, 73, 75, 636-641, 642-648, 673, 674, 680, 688		
STAN	 DARD III: Students will use spatial and logical reasoning to I	recognize, describe, and analyze geometric sha	pes and principles.	
	entage of coverage in the <i>student and teacher edition</i> for lard III:	Percentage of coverage not in student or teach the ancillary material for Standard III:		ered in
Овје	CTIVES & INDICATORS	Coverage in Student Edition(SE) and Teacher Edition (TE) (pg #'s, etc.)	Coverage in  Ancillary Material  (titles, pg #'s, etc.)	Not covered in TE, SE or ancillaries
	ctive 3.1: Identify and analyze attributes and properties of etric shapes to solve problems.			

a. Identify the midpoint of a line segment and the center and circumference of a circle.  b. Identify angles as vertical, adjacent, complementary, or supplementary and provide descriptions of these terms.  c. Develop and use the properties of complementary and supplementary and provide descriptions of these terms.  SE/TE: 479-484, 491,492, 499, 511, 515, 696  SE/TE: 479-484, 491,492, 499, 511, 515, 696, 714  SE/TE: 479-484, 492, 511, 515, 696, 714  SE/TE: 479-484, 492, 511, 515, 696, 714  SE/TE: 615-619, 624, 625  Identify the location of the new vertices shapes after applying transformations on a coordinate plane.  a. Rotate a polygon about the origin by a multiple of 90° and identify the location of the new vertices.  b. Translate a polygon either horizontally or vertically on a coordinate grid and identify the location of the new vertices.  c. Reflect a polygon across either the x- or y-axis and identify the location of the new vertices.  SEADARD IV: Students will understand and apply measurement tools and techniques and find the circumference and area of a circle.  Percentage of coverage in the student and teacher edition for Standard IV:  100  Coverage in Student Edition(SE) and Ancillary Material (titles, pg #'s, etc.)  Not covered in Teacher Edition (TE) (pg #'s, etc.)  Objective 4.1: Describe and find the circumference and area of a circle.  SE/TE: 528-533, 545, 561, 562, 565, LA15, eight and circumference to develop the formula for 698					
c. Develop and use the properties of complementary and supplementary angles and the sum of the angles of a triangle to solve problems involving an unknown angle in a triangle or quadrilateral.  Discriber 3.2: Visualize and identify geometric shapes after applying transformations on a coordinate plane.  a. Rotate a polygon about the origin by a multiple of 90° and identify the location of the new vertices.  b. Translate a polygon either horizontally or vertically on a coordinate grid and identify the location of the new vertices.  c. Reflect a polygon ceither the x- or y-axis and identify the location of the new vertices.  SE/TE: 604-609, 604-609, 619, 620, 623, 625, 627  c. Reflect a polygon across either the x- or y-axis and identify the location of the new vertices.  STANDARD IV: Students will understand and apply measurement tools and techniques and find the circumference and area of a circle. 	bjective 5.1: Design investigations to reach conclusions ing statistical methods to make inferences based on data.			
a.	Design investigations to answer questions.	SE/TE: 119-120, 214, 254, 328, 341, 394-397, 399, 442, 560, 592		
b.	Extend data display and comparisons to include scatter plots and circle graphs.	SE/TE: 81-85, 236-237, 259, 370-375, 377, 380, 388, 407, 626		
c.	Compare two similar sets of data on the same graph and compare two graphs representing the same set of data.	SE/TE: 86-87, 90, 675		
d.	Recognize that changing the scale influences the appearance of a display of data.	SE/TE: 81-82, 133, 757-758		
e.	Propose and justify inferences and predictions based on data.	SE/TE: 88-91, 120, 128, 131, 335-338, 339, 394-398, 409, 675		
Object outco	etive 5.2: Apply basic concepts of probability and justify mes.			
a.	Write the results of a probability experiment as a fraction between zero and one, or an equivalent percent.	SE/TE: 339, 381-386, 387, 388, 389-393, 394-398, 399, 406, 408, 409, 411, 412, 691, 759-760		
b.	Compare experimental results with theoretical results (e.g., experimental: 7 out of 10 trials; whereas, theoretical 5 out of 10 trials).	SE/TE: 387, 394-397		

c.	Compare individual, small group, and large group results of a	SE/TE: 394-397, 399, 401-405, 409, 410,	
	probability experiment in order to more accurately estimate	691, 760	
	the actual probabilities.
